CGIAR Research Program on Water, Land and Ecosystems

The **International Water Management Institute (IWMI)** is a non-profit scientific research organization that has as its mission the improved management of land and water resources in developing countries.

www.iwmi.org

IWMI is a member of CGIAR, a consortium of 15 international research centers supported by governments, private foundations and international and regional organizations.

www.cgiar.org

The CGIAR Research Program on Water, Land and Ecosystems examines how we can intensify agriculture while still protecting the environment and lifting millions of farm families out of poverty.

wle.cgiar.org

The CGIAR Challenge Program on Water and Food was launched in 2002 and aims to increase the resilience of social and ecological systems through better water management for food production.
